In my Forty-fourth Successful Numismatic Year!

FRED E. OLSEN

**B**ELONGING to the classification "Natural Collectors," Fred Olsen has collected a great many things: Stamps with his son, ferns and wild flowers with all the family, and coins with his daughter.

Numismatics seemed to be far enough removed from chemistry, especially as applied to the development of ammunition and explosives, to provide real relaxation.

This reference to explosives gives the hint as to his professional activities for the past twenty-seven years. Ten years were spent in research work on explosives and ammunition for the Ordnance Department of the U. S. Army. For the past fifteen years he has been Director of Research for the Western Cartridge Co., which, with its illustrious affiliate—the Winchester Repeating Arms Co.—has catered to the Sporting Public in peace time, and to the armed forces in time of war.

The reason for the painstaking searches, which finally culminated in the collection of a complete set of Stellas, was the interest in the development of an international currency.

Much public attention is now being given to the possibility of establishing an international currency, which will aid in the stabilization of world economics in the postwar era. The Stella represents the most constructive effort yet put forward in providing a coinage based on gold, which could be readily interpreted and accurately evaluated in all foreign countries.

# THE TERMS OF THIS IMPORTANT SALE ARE AS FOLLOWS:

PLEASE NOTE: I respectfully solicit your bids for this outstanding Sale. I am sure that you will want at least some items from this great Sale. I assure you that your bids will be executed by me as fairly as if you had been present at the Sale.

BUT,—**before bidding, please read the following terms**, as they are the ONLY terms upon which your bids will be accepted. And no exception can or will be made for anyone. I mention this because at every Sale someone ignores the Terms as here published, and misunderstandings occur. I am endeavoring to avoid this. So please take a few moments time to read the Terms of Sale.

All bids are entered as received and the lots allotted to the highest bidder. Where two or more highest bids for the same amount are received for the same lot (and this happens very frequently) the first bid received gets the lot. Where two or more unlimited bids are received for a certain lot, the lot is purchased for the first received. Unlimited bids are executed at an advance of five per cent (5%) over the next highest bid.

When I receive your bids, I consider myself as your agent and execute your bids at as much under your bids as the next highest bid will permit. In other words, your bids are executed for you by me just as faithfully as if you had yourself been present at the Sale.

**No commission charge will be made on purchases made for you at this Sale.**

All lots are sold just as cataloged. No lot is broken under any circumstances. Please be sure and bid by the number of the lot and at **SO MUCH PER PIECE**. As an example, if there are ten pieces in the lot and you want to make your bid \$1.00 for the lot, make your bid 10c, and not \$1.00.

I guarantee all coins and notes to be genuine unless otherwise described or stated in the Catalog. **But all claims of any nature or for any reason must be made within thirty days from date of Sale.** My guarantee means something to you. Please remember that there are more than forty years of proven successful numismatic experience and ample financial responsibility back of my guarantee.

**NOTICE TO NEW BIDDERS:** Buying coins at auction is not the same as receiving coins on approval. The coins are bought for you on your order and you are, of course, expected to accept and pay promptly for them. Auction purchases are strictly net cash. Be careful in making your bids. Be sure that you bid on the correct lot you desire and at **SO MUCH PER PIECE**.

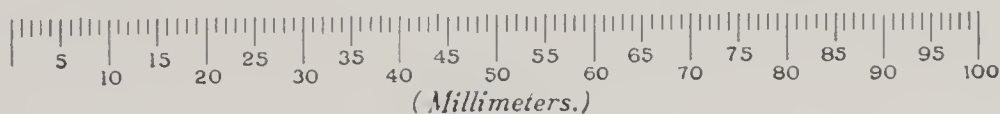

PLEASE NOTE: Parties unknown to me and who have not had any previous credit established, or do not have a financial rating in Dun & Bradstreet, must send a deposit of at least 25% of the amount of their bids, **otherwise they cannot and will not be accepted.**

The Price List of this great Sale will be printed on the same quality paper as the body of the catalog, and of the same page size. The Price List will show the amount each and every coin sold for. Price for this list now is only \$1. But this price holds good only until date of Sale, after which the price will be \$2.

PLEASE NOTE: This Sale is so huge, it may take longer to dispatch the lots to the successful bidders. The Price Lists may be a little late in being distributed, so please be patient. The Price Lists will be dispatched as promptly as is humanly possible.

Of course, all bids must be in my office on or before the date of sale. In this instance, I will appreciate more than ever before if you will kindly send your bids in early. By so doing you will earn my gratitude and you may obtain a lot which you may miss by sending your bids late.

The Size of Coins and Medals in this Catalog is given by Millimeters.

### **Remarkable Set of the Very Rare and Much Sought-After 1856 Flying Eagle Cents**

- 506 **1856** Flying Eagle Cent. Type of regular issue. Mr. Olsen has this described as "struck in nickel." Mr. Olsen, being a scientist, certainly should know metals. The coin however shows slight color of having a slight mixture of copper, but it is much lighter than the copper-nickel variety of this most popular coin. Proof, iridescent surface. Very rare and in great demand. Record over \$100.00.

## U. S. PATTERN CENTS

Lot No.

- 507 **1856** Flying Eagle Cent. Type as last, but struck in pure copper and thick planchet. Unpublished variety, as this particular variety listed in A-W is listed as thin planchet. May be unique. Practically uncirculated. Extremely rare. Not more than eight minted.
- 508 **1856** Flying Eagle Cent. Copper-nickel. The least rare variety. This coin is described by Mr. Olsen's container as a brilliant proof. The coin has a brilliant surface, but it shows slight cabinet friction and apparently has been slightly cleaned. But it is a most desirable specimen of this rarity, and in the present market should bring at least \$100.00.
- 509 **1856** Flying Eagle Cent. Obverse as last. Reverse, oak wreath and ornamental shield. Copper-nickel. A-W 210, Rarity 12. Only eight minted. Uncirculated, but dulled surface. Excessively rare. About one hundred times as rare as the ordinary variety of this Cent which brings over \$100.00.
- 510 **1856** Flying Eagle Cent. Variety without legend and without date on obverse. The flying eagle is in plain field. Reverse, type of regular issue. Struck in copper. Iridescent red proof. A-W 212. Only eight specimens said to have been struck. Excessively rare.
- 511 **1856** Flying Eagle Cent. Another as last, duplicate. The envelope is described as a "perfect brilliant proof." I classify it as an iridescent proof. Said to have cost \$135.00. If the ordinary 1856 flying eagle cent is worth and has a record of \$125.00, made in the Roach Sale, this coin is worth at least ten times as much.
- 512 **1856** Flying Eagle Cent. Type of regular issue, with legend but without date. A-W 215. However, the A-W description is that of nickel, while this specimen, in my judgment, is copper nickel which is unpublished. Uncirculated, mint luster. Excessively rare.
- 513 1857 Flying Eagle Cent, regular dies, but struck in copper on thick planchet; raised borders. A-W 226, Rarity 12. Only eight minted. Uncirculated; iridescent proof surface. Extremely rare.
- 514 1858 Flying Eagle Cent. Small letters. Struck in pure copper. A-W 241. Thin planchet. About uncirculated, but weakly struck. Rarity 12. Only eight minted. Extremely rare and valuable.
- 515 1858 Flying Eagle Cent. Obverse as regular issue, small letters. Reverse, oak wreath. Copper-nickel. A-W 243. Proof. Very rare; far more so than the 1856.
- 516 1858 Flying Eagle Cent. Obverse as last. Reverse, laurel wreath. Variety with small letters. A-W 244. Copper-nickel proof. Rare.
- 517 1858 Flying Eagle. Reverse, laurel wreath. Struck in copper-nickel. A-W 244. Only 75 minted. Proof, not in full brilliancy. Rare.

- 523 1858 Indian head. Reverse, tobacco wreath. Copper-nickel. A-W 270. Brilliant proof. Rare.

- 529 **1860-1859** Copper-nickel Cent, with Indian head and date, 1860, on obverse, and same design but with date, 1859, on reverse. A-W 333. **Unique.** About uncirculated. Valued at \$100.00 several years ago.
- 530 1860 Obverse of regular issue, but struck in silver. Unpublished. Claimed to be unique. Uncirculated.
- 531 1863 Type of regular issue, copper-nickel, but struck on thick planchet, plain edge. A-W 421. Bright uncirculated with some proof surface. Extremely rare and valuable. Valued at \$50.00.

## U. S. PATTERN CENTS

Lot No.

**The EXCESSIVELY RARE PATTERN FIFTY-DOLLAR GOLD PIECE**

- 605 1877 Fifty Dollars. Beautiful head of Liberty with diadem inscribed LIBERTY. Thirteen stars, date below. Reverse, eagle, type as appears on our Double Eagles; motto above, UNITED STATES OF AMERICA. FIFTY DOLLARS. Copper, milled edge. Gilted. A-W 1501. Only about 15 minted. Of highest historical interest and of excessive rarity. The first to be offered at auction in nearly a quarter of a century. Proof; the obverse almost in full brilliancy, the reverse slightly dull. A most thrilling coin to look at and certainly more thrilling to own.

These beautiful Patterns were struck as a result of a petition presented by the business men of San Francisco. This petition met with favorable attention of Mr. Guthrie, who was then Secretary of the Treasury. In his comment regarding the contemplated issue, he stated as follows:

*"There are certain peculiarities in the condition of California which recommends a different scale of coinage for that region. These are: First, of the prohibition and entire exclusion of paper money; and, second, the high scale of prices prevalent in California. These circumstances will make larger denominations of coin convenient, particularly in counting and passing large sums. To this may be added that time will be saved in coining, . . ."*

*"In order to harmonize the proposed large coins with the present recognized coins, I would recommend that the coinage be authorized of pieces of \$100., and \$50., and \$25., to be called the 'Union,' 'Half Union,' and 'Quarter Union,' but that the 'Half Union' only be struck for the present."*

Badly needed as were the gold coins provided by this law, it never became a law. While the bill passed the Senate by a large majority, but it failed to meet the approval of the House. However, two specimens were struck in gold, and about fifteen in copper. Since the bill failed to pass, the two gold specimens disappeared from the Mint, and it was stated that the Chief Coiner of that time remelted the coins. But in 1909, when this Chief Coiner's Collection came on the market, the two gold specimens were discovered. They were sold to the late William H. Woodin, who later was Secretary of the U. S. Treasury, for \$20,000.00. However, since the coins left the Mint without authority, Mr. Woodin returned the coins to the Government and these two specimens in gold are now in the Mint Collection.

For a more complete history of these remarkable and great rarities, see Adams-Woodin Book on the Pattern Coins. This book is now available of me at \$3.00 per copy.

### THE STELLA

Several attempts have been made from time to time to modify our currency for the purpose of stimulating foreign trade. We nearly lost much of our Chinese business because our dollar did not compare in silver content with the Mexican and other coinage. The Trade Dollar was the device adopted for several years to try and correct that deficiency.

But many years before the advent of the Trade Dollar, there had been held in Paris a Currency Convention whose main purpose was to devise a gold coin which would serve as an International Standard of Currency. This Convention was held in 1867, and the French Mint struck a gold coin whose obverse showed the head of Napoleon III and whose reverse bore the dual statement of value—"5 Dollars—25 Francs."

Based on the exchange value of the franc and the dollar, and using the franc as the unit, the value of the 5 Dollars on this coin would be 17.5 cents less than the regular issue of the five-dollar gold piece. However, it was felt we should accept this minor change in our dollar valuation.

In a spirit of cooperation the Director of the Mint ordered the issue of a pattern to correspond to this French coin, and Anthony C. Paquet designed the U. S. Equivalent coin, bearing the head of Liberty on the obverse, and "5 dollars—25 francs" on the reverse. It was struck in 1868 in copper and aluminum with plain and with reeded edges, and is represented by Patterns A-W 653, 654, 655 and 656.

Congress did not approve the proposed International coin.

The next attempt to introduce an international coinage was not based so much upon the desire to stimulate foreign trade as to increase the convenience of foreign travel. Dana Bickford had objected to the annoyances of calculating the value of his U. S. money while travelling in various European countries. In 1874 he persuaded the Director of the Mint to design a ten dollar pattern on which was to be inscribed in the center of the coin the weight

and fineness of the gold, namely "16.72 grams .900 fine Ten Dol." The reverse also showed six sections on which was given the value of this coin in terms of the currency of six countries. Thus:—

In United States.....	Dollars 10
In Great Britain .....	Sterling £2-1-1
In Germany.....	Marken 41.99
In Austria .....	Kronen 37.31
In Holland .....	Gulden 20.70
In France .....	Francs 51.81

Again the Congress did not adopt this coin.

Finally in 1879 the most interesting pattern of all the International series was designed. This was the Stella—a four-dollar gold piece.

The Secretary of State requested the Secretary of the Treasury to study the development of a coin which would most nearly equal in value the common trading units of the important commercial nations.

Dr. Hubbell devised the unit Four Dollar (or 400 Cents), which was conveniently close to the value of the French 20 francs, the Italian 20 lire, the Spanish 20 pesetas, the Dutch 8 florins, the Austrian 8 florins, and was not too far off the British pound. It was also intermediate between our own \$2.50 and \$5.00 and would serve us satisfactorily in place of both.

A good deal of enthusiasm was developed for this idea, and it was hoped the various European countries could agree upon such an International Coin, and thus facilitate trade between the countries.

To add to the convenience of the coin, it was to show the weight of each ingredient. Thus, the \$4.00 gold piece weighed exactly 7 grams and contained 6 grams gold, 0.3 gram silver, and 0.7 gram copper.

The name "Stella" was chosen for the coin because the "star" and the eagle are the national emblems on our coins. The word Stella was inscribed on the body of the star.

Charles E. Barber designed the coin in two styles, one with Liberty having flowing hair quite similar to several of the earlier American issues. On the other, Liberty was given what was a more stylish "hair-do" for the late seventies.

In 1879 the flowing hair type was issued in gold, copper, and aluminum, while the coiled hair was issued in gold, copper, aluminum, and uniquely in white metal. These comprise patterns A-W 1575 to 1581 inclusive.

These are listed in the book "United States Patterns, Trial and Experimental Pieces" by Edgar H. Adams and William H. Woodin. Two other pattern Stellas. A—W 1582 and 1583. These were described by Dr. Davis as being of reduced size, but the authors of the book add significantly, "we have not seen a specimen of this type."

I have been at great pains to inquire from all possible sources regarding these two alleged stellas. The current recognized numismatic authorities and all the larger dealers of today are unanimous in stating that they have never seen a specimen, nor have they heard of any collector who possessed one. We therefore conclude with these authorities that these two patterns A-W 1582 and 1583 do not exist.

In 1880 the flowing hair and coiled hair varieties were again struck in gold, copper and aluminum.

However, the same sentence must be repeated for the Stella—"Congress did not adopt this coin."

## THE "STELLAS"

Before leaving the subject, reference should be made to one of the most beautiful of all patterns—the Metric Double Eagle of 1879—A-W 1572. This splendid coin is a sort of **5-stella piece**, and contains exactly five times the amount of gold, silver and copper found in the Stella. Actually it weighed 35 grams, and contained 30 grams of pure gold, valued at \$19.938, 1.5 grams pure silver, worth \$0.062, and 3.5 grams copper, of no stated value.

It was reported on favorably by the Committee of Coinage, but like the Stella, was not adopted.

In the light of the very recent discussions by the United Nations to seek a stabilized post war currency, it is especially interesting to numismatists to watch the efforts of a new generation, perhaps unacquainted with the history of our own coinage, to struggle once more with the problems of an international currency.

Perhaps the Stella will be re-invented!

### UNITED STATES FOUR-DOLLAR GOLD PIECES or STELLAS

**The First and Only Complete Set of these Highly Interesting and Extremely Rare Coins That Has Ever Before Been Offered, Including Both Dates, Both Varieties and All the Metals in Which They Were Minted.**

Lot No.

- 611 **1879 \$4.00 Gold.** Beautiful head of Liberty with flowing hair. Reverse, a large five-pointed star on which is incused, stamped in, ONE STELLA 400 CENTS. Legend, value and motto. About 500 specimens struck. Beautiful brilliant proof. Extremely rare and valuable. The specimen in my great Dunham Sale, in 1941, brought \$192.50, which was then considered a high price, but in my Sale of the Roach Collection, held in February of this year, a similar specimen brought \$365.00. In great demand.
- 612 **1879 \$4.00 Gold.** Flowing hair. Just as last, but struck in copper. A-W 1576. Iridescent proof. Excessively rare. Only 15 minted. By far of greater rarity than the gold specimen. Seldom offered. There are far fewer specimens offered of this variety than there are of the gold.
- 613 **1879 \$4.00.** Same type as last, but struck in aluminum, wire edge. A-W 1577, Rarity 13. Only four or five minted. Proof. Of excessive rarity.

### Complete Set of the Excessively Rare 1879 Coiled-Hair Stellas

Lot No.

- 614 **1879 \$4.00 Gold.** Liberty head with coiled hair, the hair-do prevalent in 1879, otherwise same type as last. Struck in gold. Brilliant proof. Excessively rare and valuable. Only about twelve minted.
- 615 1879 \$4.00. Same type as last, coiled hair. Struck in copper. A-W 1579. Only 15 minted. Beautiful iridescent proof. Wire edge. Of the same excessive rarity as the gold specimen.
- 616 1879 \$4.00. Coiled hair, same as last, bust struck in aluminum. A-W 1580, Rarity 13. Only five minted. Brilliant proof, with fairly high wire edge. From the great Newcomer Collection. Excessively rare and valuable, more so than the gold specimen.
- 617 1879 \$4.00. Type as last, but struck in white metal. Slightly thicker planchet. A-W 1581. Claimed to be unique. From the Newcomer Collection. Of excessive rarity, and I believe offered at auction for the first time.

### Remarkable Complete Set of the 1880 Four-Dollar Gold Pieces

- 618 **1880 \$4.00 Gold.** Flowing hair type, same as the 1879. Struck in gold. Beautiful perfect brilliant proof. A gem. From the great Dunham Sale, where this coin brought \$490.00. But a similar specimen in my Sale of the Roach Collection, in February of this year, brought \$632.50. Only about 20 specimens minted. A coin that should bring very near the four-figure mark.
- 619 1880 \$4.00 Same type as last, flowing hair, but struck in copper. A-W 1631. Only 15 minted. Brilliant proof. Excessively rare. Just as rare as the gold specimen, but not as often offered.

## U. S. FOUR-DOLLAR GOLD PIECES

Lot No.

- 620 1880 \$4.00. Type as last, flowing hair. Struck in aluminum. A-W 1632. Only eight minted. From the great Newcomer Collection. Brilliant proof. Of excessive rarity, more so than the gold specimen.

- 621 **1880 \$4.00 Gold. Coiled Hair.** Struck in yellow gold. Perfect brilliant proof gem. Only about twelve minted. The last specimen I sold was in the Grinnell Collection in June, 1943. It brought \$850.00. The specimens that do appear at auction or are on the market are the same coins being offered from one collection to another. This is only the third or fourth time that I have ever had one of these great rarities pass through my hands. I feel that this coin is certainly destined to become a \$1,000.00 coin or more.
- 622 1880 \$4.00. Same type as last, coiled hair. Struck in copper. A-W 1634, Rarity 10. Only 15 minted. Wire edge. Beautiful iridescent proof. Unusually bold impression. Of excessive rarity. I have had fewer specimens of this coin pass through my hands than I have had of the specimens in gold.
- 623 1880 \$4.00. Type just as last, but struck in aluminum with wire edge. A-W 1635, Rarity 12. Only eight minted. Brilliant proof. From the great Newcomer Collection. The rarest variety of this great series.

NOTE:—

In my humble opinion there is a vast difference between the rarity and value of a coin. Often a coin may be of excessive rarity in point of the number of specimens minted, but then its value may not be so high. The value enters comparable to the popularity or demand for the coin.

The Stellas, to my mind, are both extremely rare and very valuable, for the reason that not only a limited number were minted, but although some collectors may not be at all interested in Pattern coins, yet they are very much interested in the \$4.00 Gold Piece and practically every collector of gold includes the \$4.00 gold piece in the regular series of U. S. gold coins, hence the Stellas, due to their odd denomination, are very much sought-after by all collectors, as is evidenced by the greatly enhanced values they now enjoy.

It is not very long ago when One Hundred Dollars was about the average price for the 1879 Stella, and today its latest record is \$365.00. With the greatly increased number of collectors now interested in gold, I honestly believe that we have not seen the beginning of the value of this most interesting coin.

The Exceedingly Rare "Quintuple Stella" or \$20.00 Metric  
Coin in Gold

Lot No.

624 **1879 Five-Stella Coin.** Beautiful head of Liberty with the portions of different metals contained therein, and its weight, around head. Reverse, type similar to regular issue. Struck in gold. Perfect brilliant proof. A gem. According to A-W only four specimens were struck. Listed in A-W as No. 1572, Rarity 13.

"The important advantages of this Metric Gold Coin are that the gold is even 30 grams, the silver even 1.5 grams, the copper 3.5 grams. The gold, therefore, is standard .9 fine and the silver is .9 fine in the coin, and the total weight is even 35 grams, and is precisely \$20. in value. The superiority of the metal for constancy in value is strikingly shown by the fact that although it measures the same in diameter and on a plane as the binary \$20. coin, it (the metric) is 24 grains heavier, or 540.25 plus grains in weight, showing as well as in the rich orange color its superiority for practical use, as it flows with a sharper and more distinct finish into the dies."

To the best of my recollection, this is the first and only specimen I have ever had the pleasure of offering at auction. I have had only one other specimen pass through my hands in my forty-four years of numismatic experience. I do not hesitate to make the statement that this is as beautiful a Double Eagle as ever issued by our Government and certainly by far the rarest. In fact, in actual rarity, I doubt if there are more than one or two United States Gold coins which exceed it. A gem and rarity of the highest order and a prized possession for any collection.

## EXCESSIVELY RARE PANAMA-PACIFIC PATTERN HALF DOLLAR

Lot No.

- 625 1915 Panama-Pacific Half-Dollar **struck in copper**, and without the mint letter "S" as appears on the silver coins of this issue. This specimen was struck at the Philadelphia Mint and not at San Francisco, apparently before the dies were delivered to the San Francisco Mint. Only two specimens known, and this is the first time a specimen is offered at auction. Excessively rare and valuable. Cost \$150.00. In point of actual rarity, it is worth a great deal more today.

**U. S. COMMEMORATIVE GOLD COINS**  
**COMPLETE SET of PANAMA-PACIFIC COINS**  
**In Original Copper Frame**

Lot No.

- 822 1915 Complete set of Panama-Pacific Commemorative Coins, consisting of two Fifty-Dollar Gold pieces, round and octagonal; \$2.50 and \$1.00 gold, and Half-Dollar in silver. The coins are mounted on a plush background with full description of each coin printed in gold on purple card, beneath each coin, and the whole is framed under glass in hammered copper frame, with easel. The set, of course, is just as perfect as the day it was minted. Only a very few sets were so issued. Extremely rare and valuable and now in great demand. Record over \$800.00. With the present demand for gold coins, and the limited number of these pieces issued, it would not surprise me to see this set bring up to \$1,000.00, as I really think it is worth that amount today. Please make your bid on this set as a whole or as one piece. The two \$50.00 pieces alone now catalog for \$850.00.

A beautiful even light iridescent purple proof. Of excessive rarity and as valuable as any U. S. silver dollar.

Lot No. 1551

**The RENOWNED U. S. 1913 LIBERTY HEAD NICKEL**

**1913** U. S. Five-Cent Nickel with **LIBERTY HEAD**. Uncirculated, sharp, with bold impression. Only five specimens struck and this is claimed to be the sharpest and best of the lot. Of excessive rarity.

I plead guilty to being responsible for making this coin so famous, having used it in all of my national advertising for a period of about a quarter of a century, during which time it appeared in advertising totalling an expenditure of well over a Million Dollars!

As is well known, the regular issue of the Liberty head nickels was discontinued in 1912, and the Buffalo nickels appeared in 1913, but apparently a few specimens, only five of the Liberty head type were struck in 1913. The entire lot was purchased about fifteen years after their issue by the late Col. E. H. R. Green. All five specimens were immediately absorbed by private collectors. Mr. Olson paid no less than \$900.00 for this coin. And since its purchase, he was offered \$1,000.00 for it by the dealer of whom he purchased it. I mention this so as to give you an idea of the value of the coin, as I am sure of receiving numerous inquiries as to its probable worth. To the collector of today, this coin is better known and of greater fame than our 1804 Silver Dollar. It is, of course, considered as one of our greatest rarities from every point of view, and rightly so. One owner of a specimen of this great coin recently wrote me that he considered his coin worth \$5,000.00. It is difficult to place a value on a coin of this kind, but in my opinion, the price offered for this coin recently by a dealer, that of \$1,000.00, I consider very nominal. Certainly, this great coin will prove a most gratifying source of possession to the fortunate owner and also a profitable investment as well.

## SOME EXCESSIVELY RARE UNITED STATES COINS, and FOREIGN GOLD

### Excessively Rare U. S. Silver Dollars

Lot No.

- 1764 **1836** Flying Eagle Dollar. Name on base. But the excessively rare variety with plain edge and **no stars on reverse**. Silver. Only six to eight coined. One of our rarest silver Dollars and seldom offered. As rare as the 1804 Dollar. Valued by former owner at \$500.00 and should bring more today. Proof.
- 1765 **1838** The excessively rare variety with **plain edge**. According to Adams-Woodin, only two specimens are known. Beautiful perfect brilliant proof. Of highest rarity and value. A coin that is really worth and should bring near the four-figure mark.
- 1766 **1839** The exceedingly rare variety with **plain edge** and no stars on reverse. Beautiful perfect brilliant proof. Only three specimens known. By far more rare than the 1804 Dollar. As rare as last. A gem. Of highest rarity and value.
- 1767 **1885 Trade Dollar**. Brilliant proof. Of excessive rarity. Probably not more than four specimens known. Listed in the Standard Catalog at \$1,000.00 and certainly worth it. In point of actual rarity it is worth at least double that of the 1804 Dollar.

### Gem 1797 Half-Dollar

- 1768 1797 Half-Dollar. Variety classed as 1 aA. Die break at second star on left to curl, and die break on reverse at upper left. Very nearly uncirculated; only highest portions show slight cabinet friction. The right obverse and the corresponding side of the reverse not as bold as the balance of the coin. This coin is rare in any condition, but in this remarkable state it is even more rare than the 1796. Of excessive rarity and value. Valued up to \$500.00.

### Remarkable Rarity of a Commemorative Coin Panama-Pacific Half-Dollar in GOLD!

- 1769 1915 Half-Dollar for the Panama-Pacific Exposition. **Struck in gold!** This specimen is without mint mark, having been struck at the Philadelphia Mint. All the silver specimens are with S Mint. Sharp uncirculated. Of highest rarity and value. Only two specimens known and I believe that these two were the only ones minted. As I will undoubtedly receive numerous inquiries as to what this coin will bring, I might say here that it is difficult to estimate the value of such a great rarity

Lot No.

which has never before been offered at auction. I can only say that it is as rare as ANY gold coin of the United States series regardless of its price. As far as rarity is concerned, I do not know of a more rare coin than this one in our entire series. It certainly should bring well into the four-figure mark.

### **The Excessively Rare U. S. Three-Dollar Gold Piece of 1875**

- 1770 1875 \$3.00. Struck in copper. Brilliant proof. Of excessive rarity. In point of the number of specimens issued, this specimen is even more rare than the one struck in gold, which has a record at private sale of \$2,000.00. Of the gold specimen, there were twenty minted, while of this one there were only four or five minted. This identical coin is from the great Colonel Green Collection. Colonel Green paid \$1,000.00 for it a number of years ago. A gem, and of highest rarity and value.

### **Excessively Rare American Colonial Coin**

#### **The VIRGINIA SHILLING in SILVER**

- 1771 1774 Virginia Shilling. Fine laureated portrait bust of George III facing right: GEORGIVS III DEI. GRATIA. The bust is much larger and of different design than that of the Halfpenny. Reverse; a crowned shield dividing date, 1774. VIRGINIA. Silver. Plain edge. Crosby, Plate IX., No. 4. Iridescent purple proof, not in full brilliancy. Excessively rare. Valued by former owner at \$900.00. A similar specimen in my Dunham sale brought \$787.50. Worth a great deal more today. Probably not more than four or five specimens known.

### **OTHER RARE AMERICAN COLONIAL COINS**

#### **The Excessively Rare New England Sixpence First Coin Struck in North America**

- 1772 (1652) New England Sixpence. Irregular silver planchet, without collar, with NE (for New England), struck in relief in depressed punchmark on upper obverse: Reverse, the value, VI. for Sixpence, stamped in relief in square punchmark. Can be classed as fine for coin, as none were struck very bold. Excessively rare and of highest historical interest. The first coin minted in America. This coin, the Sixpence, is by far of greater rarity than the Shilling. The Shilling catalogs at \$200.00, although a specimen in my Roach collection brought \$242.50. The Sixpence catalogs at \$500.00. Of greatest rarity and value. I believe this is the very first and only specimen that I have ever offered in my forty-four years of numismatic experience.

## Rare Massachusetts Pine and Oak Tree Money

Lot No.

- 1773 1652 Oak Tree Shilling. Large planchet with large letters in legend. Crosby 3-D. Very fine; in fact it can be classed as extremely fine for this coin. Extremely rare. This identical specimen cost \$75.00 a number of years ago. From the famous Colonel Green Collection.

- 1777 1662 Oak Tree Twopence. Crosby 1-A3. Very fine; one of the finest specimens I have ever seen. Die break on obverse. The rarest state of this die. Rare and valuable.
- 1778 1662 Oak Tree Twopence. The so-called "large planchet" variety. Well centered and struck. Very fine. Very rare. Catalogs at \$25.00 in the Standard Catalog, but worth more in this choice condition.
- 1779 1652 Large **Pine Tree Shilling**. Medium date and large value. Large perfect tree. Crosby 1a-C. Classed as Rarity 4. Strictly fine. Broad planchet. Rare and valuable. Similar specimens brought from \$45.00 to \$67.00 in my last Sale.
- 1780 1652 Pine Tree Shilling. Crosby 1b-D. Die breaks on obverse. Fine, strictly so; can really be classed as very fine for this coin. Rare and valuable.
- 1781 1652 Pine Tree Shilling. The smaller type, but on unusually large planchet for this type, broad borders. Strictly fine to very fine.

## EARLY SILVER COINS of MARYLAND

- 1782 1783 Annapolis, Chalmers Sixpence. **Very fine**. Extremely rare in any condition, but in this remarkable condition it is of excessive rarity. Crosby IX. No. 8, Fig. 70, Page 329. From the great Colonel Green Collection at \$200.00, and described as "Possibly the finest known."
- 1783 1783 Annapolis Shilling. Two doves. Reverse, clasped hands. Extremely fine; by far the finest specimen I have ever seen of this coin. Said to have cost \$50.00.

## Mississippi, John Law 1/8 Crown

WE ARE ONE. Extremely fine, just a shade from uncirculated. Rare and in much demand. Of historical interest. Retails up to \$50.00.

- 1787 Conn. Cent, 1787. Bust to left. Unusually choice specimen with bold impression and perfectly centered. Not a rarity, but very rare so choice. Just a shade from uncirculated. Said to have cost \$20.00.
- 1788 1783 Nova Constellatio Cent. U S in Roman letters. Large planchet. Crosby 1-A. Rarity 3. Extremely fine. Purchased of Henry Chapman a number of years ago at \$20.00.

- 1792 Virginia **Cent.** The large type, 1773. Uncirculated, dark olive surface. Rare and valuable. Retails at \$15.00.
- 1793 Washington, 1791 Cent. Beautiful portrait of Washington. Reverse, small eagle, value above, date below. Uncirculated with beautiful dark olive surface. In this condition should bring at least \$15.00 or more.
- 1794 Washington Cent, 1783. Laureated and draped bust. Reverse, Liberty seated. **Struck in silver.** Engrailed edge. Re-strike. Beautiful brilliant proof. A hardly perceptible tiny spot on obverse. Rare and valuable.
- 1795 Washington, Liberty & Security Penny. Very fine. Scarce. About size of U. S. Half-Dollar.
- 1796 Washington, Success Cent. Bust right. Reverse, Constellation "Success To The United States." Struck in brass, as all are. The large type and about as fine a specimen as I have ever seen, with unusually bold impression. These coins usually come weakly struck. Rare so choice. At least a \$10.00 coin.

- 1797 (1694) London Elephant Halfpenny, similar to rare Carolina Elephant Token. Elephant to left. Reverse, shield, GOD PRESERVE LONDON. A motto certainly appropo for today. Strictly fine. Scarce and historically interesting.

### The RAREST of ALL FUGIO CENTS

- 1798 1787 Fugio or Franklin Cent. The excessively rare variety with UNITED above and STATES below in center circle of reverse. The obverse is centered perfectly. The reverse is slightly off center as usual. Thick planchet. **Uncirculated**, with considerable original mint red nicely blended with medium olive. This variety in only fine condition catalogs at \$50.00. In this remarkable condition, the coin is almost priceless and is certainly worth well into the three-figure mark.

### UNUSUAL and RARE UNITED STATES COINS U. S. SILVER DOLLARS

- 1799 **1794** Our first regular issue silver Dollar. This specimen is far above the average, but as usual, the left obverse and corresponding reverse is not as bold as the other portions of the coin. This is typical of this rarity. Strictly very good, can almost muster fine, but initials scratched in field to left of head. But this is not as bad as it sounds. An acceptable specimen of our first regular dollar which is now in great demand and seldom offered. A fine specimen catalogs at \$300.00. This coin is hardly worth that amount, but would prove a most acceptable specimen for almost any collection.
- 1800 1850 Practically uncirculated with considerable mint luster. Very scarce, especially so choice; the edge is sharp and the coin may have originally been struck as a proof. Cost \$17.50.
- 1801 1855 **Brilliant proof.** An imperceptible short hair line above eagle's head. Excessively rare in proof. Valued by former owner at \$65.00. In great demand.
- 1802 1857 **Brilliant proof.** A gem. Extremely rare in this remarkable condition and worth almost any price it will bring. Valued at \$50.00 and certainly worth it.
- 1803 1860 Perfect brilliant proof gem. Catalogs at \$25.00 and in this beautiful condition, certainly worth it. But most of these early proof dollars bring more than the catalog prices.
- 1804 1864 Perfect brilliant proof with sharp edge. Very rare and in great demand. Listed in the new 1945 Standard Catalog at \$17.50. But I believe this to be easily a \$25.00 coin.
- 1805 1876 Nevada Centennial Dollar. Liberty Bell with soldiers of 1776 and 1876 on either side. Reverse, Nevada mining scene. Plain edge. Proof. Rare. In this choice condition, a \$20.00 coin.
- 1806 1880 Standard Dollar. Brilliant proof. Very scarce. Catalogs at \$7.50.

## U. S. HALF DIMES; PROOF SET

---

Lot No.

- 1863 1800 The rare variety with LIBEKTY instead of LIBERTY. Very fine, free from any nicks or dents, perfectly centered. Recent record, \$32.50. Worth more today.
- 1864 1800 Perfect die, LIBERTY. Very fine, strictly so. Although a very fine specimen catalogs at \$17.50, a similar specimen in my last Sale brought \$26.75. This specimen is much better and should bring much more.
- 1865 1801 Strictly very good; can be classed as fine for coin, but slightly nicked. One of the rarest of all Half-Dimes. Record up to \$90.00 for equal specimens.
- 1866 1803 Extremely fine; not very far from uncirculated. Free from any nicks or dents. Well centered, with unusually bold impression for this very rare date. Catalogs at \$35.00 in very fine. Worth more.
- 1867 **1805** The second rarest Half-Dime. Very fine, especially for this coin. Free from any nicks. Well centered and struck. Extremely rare and valuable. A similar specimen in my Roach Sale brought \$127.50. While all choice early U. S. silver is rare, but this is more true of these Half-Dimes than that of any other series. It is seldom that we find them better than fair. All of these have advanced considerably in value in the past few years, but I feel confident that their present high-level is still in its infancy.

A similar specimen in only good condition with part of the note missing, in my Grinnell Sale brought \$82.50. This specimen is worth at least double.
- 2052 **One Hundred Dollars**. First National Gold Bank of San Francisco. Allison and Spinner. Fine to very fine. For this note it can easily be classed as very fine. Of highest rarity. Not in the Grinnell Sale. I do not recollect of ever having offered a similar note in any of my sales for the past forty-four years. These rare California Gold Notes in comparison with the gold coins of California, are far more rare and are equal in rarity and value to some of the Pioneer gold coins which bring from \$250.00 to \$1,000.00 each.

*The Standard Book on the---*  
U. S. PATTERN  
COINS

*is one published in 1913 by Edgar H. Adams and  
William H. Woodin, (late Secretary of  
the U. S. Treasury).*

The original issue was published in 1913. The book lists and describes different Pattern Coins with illustrations of ALL types. It is one of *the* outstanding works on United States Coins ever published.

The original copies have sold up to \$20.00 and more per copy until a few years ago when this great book was re-printed. The original half-tone illustrations were used in this re-print, which, of course, is just as useful to you as the original \$20.00 book.

Only a limited number of re-prints were published. I have a few copies left. They are bound in blue cloth, 193 pages, hundreds of illustrations, full description of each and every pattern coin—complete history, etc. And the price for this splendid book is now only \$3. postpaid.

Every collector should have a copy of this fine work. You'll be delighted with it. If not, your money back.
